Mission Statement

To provide quality end-of-life care at no expense to the patient, while supporting their family and others in the community who are experiencing grief.

Making Every Moment Matter

Our philosophy:

- Encourage patients to live life to its fullest with the support of family and friends.
- Believes patients should remain in control of their lives and involved in decisions surrounding their care as long as possible.
- Believes patients and their families should not be burdened with additional expenses as the end of life nears.
- Recognizes death as a natural part of life's journey and neither hastens nor postpones natural death.

When should the hospice journey begin?

When an individual has a prognosis of six months or less to live and are no longer seeking curative, aggressive therapies.

Referrals come from family, friends and physicians.
